

How to install your ScreenScope LCD

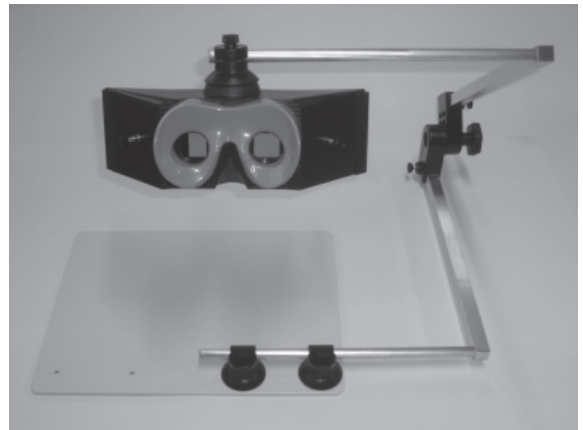

1] Bolt clamps to base plate using supplied bolts. Clamps can be placed on the left or right hand side depending on preference. Insert an extension arm into the clamps.

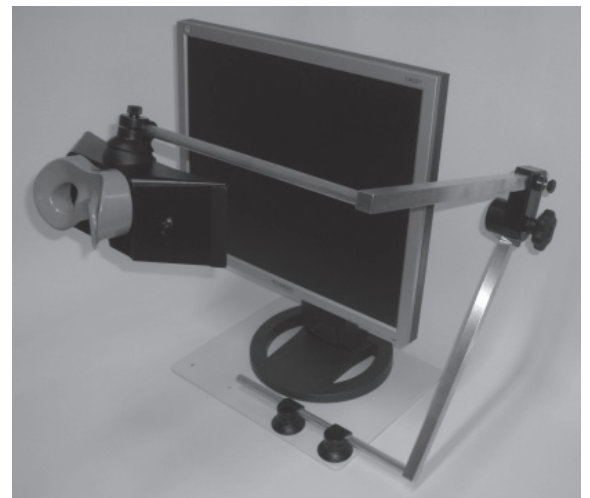

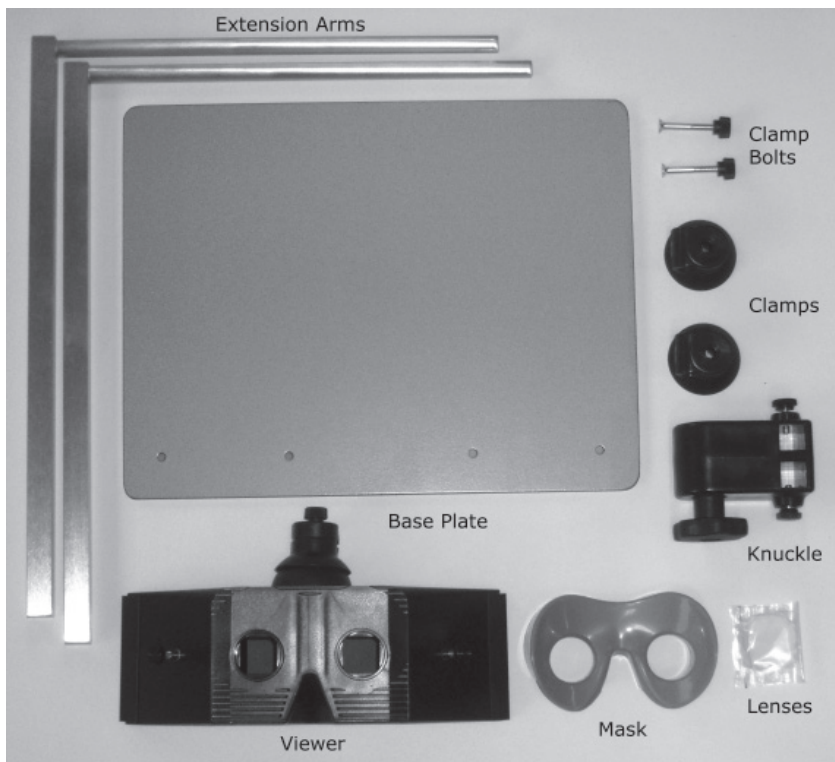

3] Insert the second extension arm into the knuckle. Tighten the locking nut and friction knob.

2] Attach the knuckle to the arm tightening the locking nut.

4] Attach the viewer to the second extension arm tightening as required. Attach the mask. Lenses can be optionally inserted into the mask prior to attaching the mask

5] Place your LCD screen on the base plate. Adjust extension arms as required.
