

How to install your ScreenScope LT

Top View Right View Left View

1] Bolt knuckle to base plate.

3] Attach viewer to the extension arm and position it so it's approximately in the centre. Tighten friction knob. Attach the mask. Lenses can be optionally inserted into the mask prior to attaching the mask

2] Insert extension arm into the knuckle. Tighten lock nut and friction knob.

4] Place your laptop on the base plate. Adjust the ScreenScope accordingly.
